

QUALITY and ENVIRONMENTAL POLICY

Issue: 02/15

It is the policy of P.A. Thorpe (Vehicle Components) Ltd., to manufacture and sell a variety of vehicle components and to be in a position to provide future innovative and cost effective solutions to Customer requirements.

The Company objective is to ensure that products delivered to customers are to specification by the concentration upon Quality Assurance during design, production, handling, storage and transportation. This is completed whilst minimising any Environmental impact that these activities necessitate in particular the use of energy & the generation of waste, together with taking pollution prevention measures.

Responsibility for Quality and Environmental requirements involves everyone within the Company with the lead being given by senior management. The Quality and Environmental Management System Manual provides the guidelines through Quality and Environmental Procedures, Process Flow Diagrams, Work Instructions, Visual Aids and associated Quality Documents.

Commitment is given to continuously improving the effectiveness Quality and Environmental Management System, as documented within both the Management Review & Environmental Committee meeting minutes, by:

- ensuring that quality and environmental risks identified have been considered and appropriate action taken
- objectives are set & monitored
- compliance to applicable statutory & regulatory requirements
